

Databricks Certification Practice Exam

Evaluation Report - Practice Exam 01

Final Score: 33/45 (73.33%)

Status: ✓ PASSING (Passing threshold: 71.11%)

Margin: +2 points above passing

Summary:

You answered 33 out of 45 questions correctly. You are above the passing threshold with a comfortable margin of 2 points. Focus on the 12 incorrect answers to improve your score further.

Questions You Got Wrong (12 total):

Q	Your Answer	Correct	Topic
2	B	A	Databricks Architecture - Control Plane vs Data Plane
5	B	C	Data Explorer for Table Permissions
8	A	B	Delta Lake Definition
9	C	B	CREATE OR REPLACE TABLE Syntax
15	D	A	Caching with External Parquet Data
16	B	A	CREATE TABLE AS SELECT Schema Inference
17	D	B	Table Overwrite vs Delete/Recreate
21	D	B	Nested Struct Field Access
24	B	D	Python F-String Formatting
28	A	C	Auto Loader Implementation
31	D	C	Bronze to Silver Table Transformation
40	E	C	SQL Endpoint Optimization

Areas to Focus On:

Priority 1 (High Impact):

- SQL DDL Syntax (Q9, Q16, Q17) - Understand CREATE TABLE variations and schema inference

- Table Operations (Q15, Q17) - Caching behavior and table overwrite vs delete/recreate
- Databricks Architecture (Q2, Q5, Q8) - Control plane, Data Explorer, Delta Lake concepts

Priority 2 (Medium Impact):

- Nested Data & Array Functions (Q21) - Accessing nested struct fields
- Medallion Architecture (Q31) - Bronze/Silver transformations and enrichment
- Python/PySpark (Q24) - F-string formatting

Priority 3 (Polish):

- Auto Loader (Q28) - Understanding how cloudFiles enables Auto Loader
- SQL Endpoint Optimization (Q40) - Cluster sizing and performance tuning
